

WE WILL GET THE JOB DONE FOR YOU

Contract Work: Mechanical Workshop

You

- » are looking for support setting up experimental equipment?
- » would like to have samples or prototypes produced?
- » need an experienced partner for the machining of special materials (e.g. titanium aluminides, high temperature materials, nickel-base alloys, etc.)?

We

- » are an independent research institute working in the areas of materials, chemical technology, and biotechnology.
- » offer competent workshop manufacture of individual equipment and components with 50 years of experience in the area of research and development.

Our strengths

- » Continuity and expertise: Experienced industrial mechanics will work on your project
- » Lean organization: We keep bureaucracy to a minimum
- » Speed: We will start working on your project immediately
- » Experience: Year-long collaboration with medium and large industrial companies

We are your partner

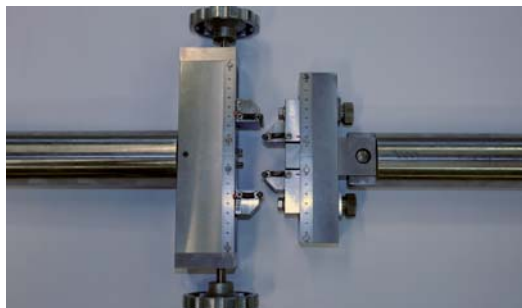

Contact us!

Our know-how

- » Machining of steels, non-ferrous metals, plastics, ceramics, intermetallic materials
- » Developing and manufacturing hardware, analytical equipment, test stations, etc. in cooperation with the contractor
- » Preparing ambitious individual solutions

Facilities

- » lathes (CNC and manual)
- » milling machines (CNC and manual)
- » wire eroding machines
- » surface grinding machine
- » pillar drills
- » vertical band saw
- » vertical circular saw
- » band grinder
- » TIG welding
- » cutting machine
- » blasting crucible - glass pearls
- » CO2 laser engraving and cutting system
- » ...and many more
